

Mining Chain

Quality is key to meeting the challenges of heavy-duty mining equipment. Renold Jeffrey Mining Chains are built to last in a wide selection of demanding applications — including shuttle cars, feeder breakers, bridge conveyors, wash boxes and ram drives.

Pins are made of heat-treated alloy steel or case-hardened carbon steel and are press-fit into sidebar holes to reduce wear and to maintain dimensional accuracy. Sidebars are either heat-treated medium carbon or alloy steel. Straight, offset, and figure-8 sidebar constructions are offered.
